Introducing Wayne

As Managing Director of Impact Group, Wayne Golledge utilises his consummate leadership and strategic skills to spearhead the business to ever greater success. With Wayne at the helm, the company has grown exponentially over recent years. In large part, this growth is a result of his professionalism and commitment to nurturing a cohesive team that delivers on its promises.

Wayne offers 30+ years' experience in the industry – a career he began as a labourer whilst still in high school and, ultimately, as Managing Director of Impact Group since its inception in 1999.

He cares about his clients' businesses as much as they do, manages their budgets like they were his own, and consistently strives to align their businesses with the best-fit project manager.

He believes that great communication – both in-house and external – is the key to ensuring every project runs smoothly.

Wayne brings to his role a deep sense of empathy for client needs and priorities as well as exceptional commercial, operational and financial awareness.

He also understands that great people are the backbone of an organisation. With them at his side, successful projects are delivered time and time again.
